Project 8C triangulated spaceframe validation

STATUS: CONCEPT / DESIGN REVIEW / ENGINEERING HOLD

Architecture
  78 dedicated SF members: paired rails, side X-bracing, crossmembers, front/rear
  Supplied C18 front: 108 solids + 3 adapters = 111.
  Supplied Probox rear: 199 solids + 4 adapters = 203.

Re-import checks
  FreeCAD master: 214 objects; no invalid shapes
  Spaceframe STEP: 78 valid solids
  Structural assembly: 124 valid solids
  Full review assembly: 457 valid solids
  Donor review: 328 valid solids
  Units/axes: mm, +X front, +Y left, +Z up
  Body scale 2100/1770: PASS

No tube grade, weld detail, donor hole pattern, suspension mount proof, drivetrain
